SUMMARY

Cloud & DevOps Engineer with nearly 2 years of experience in Google Cloud Platform (GCP), infrastructure automation, cloud operations, and DevOps practices. Skilled in Terraform, Docker, Kubernetes, CI/CD, Linux, IAM, VPC, Cloud SQL, and cloud monitoring. Experienced in provisioning scalable cloud infrastructure, automating deployments, troubleshooting production issues, and supporting enterprise workloads. Passionate about building reliable, secure, and highly available cloud environments through automation and modern DevOps methodologies.

SKILLS

Cloud Platforms	- Google Cloud Platform (GCP) - AWS Fundamentals
DevOps & IaC	- Terraform - CI/CD - Infrastructure Automation
Containerization & Orchestration	- Docker - Kubernetes
Monitoring & Operations	- Cloud Monitoring - Logging - Incident Management - Troubleshooting
Networking & Security	- IAM - VPC - DNS - HTTP - TCP/IP
Programming & Scripting	- Java - SQL - Basic Shell Scripting - Python
Tools	- Git - Jira - ServiceNow - VS Code

WORK EXPERIENCE

Cloud & DevOps Engineer | Movate Technologies

July 2024 - Present

- Provisioned and maintained Google Cloud Platform (GCP) resources including Compute Engine, Cloud SQL, Cloud Storage, IAM, and VPC networks to support enterprise applications.
 - Automated infrastructure provisioning using Terraform, enabling consistent, scalable, and repeatable deployments through Infrastructure as Code (IaC).
 - Collaborated with development and support teams to troubleshoot cloud infrastructure and deployment-related issues, ensuring high service availability.
 - Monitored production environments using Cloud Monitoring, Logging, and alerting policies to proactively detect and resolve incidents.
 - Managed IAM roles, policies, and service accounts following security best practices and least-privilege access principles.
 - Utilized Linux-based environments and cloud-native tools for operational support and infrastructure management.
 - Worked with version control systems and change management processes to support cloud operations and release activities.
 - Contributed to infrastructure optimization, reliability improvements, and operational excellence initiatives.
-

PROJECTS

Scalable Cloud Architecture Simulation with Terraform (GCP Focus)

Tech Stack: Terraform, GCP, IAM, VPC, Compute Engine, Linux

- Designed and implemented reusable Terraform modules for scalable cloud infrastructure deployment.
 - Automated provisioning of VPC networks, IAM configurations, and Compute Engine instances using Infrastructure as Code principles.
 - Implemented modular architecture for maintainability, scalability, and infrastructure standardization.
 - Simulated enterprise cloud deployment workflows and infrastructure lifecycle management.
 - Applied DevOps and cloud engineering best practices to create reproducible and automated infrastructure environments.
-

CERTIFICATIONS

- Google Certified Associate Cloud Engineer (ACE)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - AWS Certified: Introduction to Cloud 101
 - NPTEL: Programming in Java
-

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Sri Manakula Vinayagar Engineering College | 2020-2024 | CGPA: 8.59
